

GREEN EUROPEAN FOUNDATION

2 Tonnes of Carbon by 2022: Lifestyle, Economics & Science 1 Day Conference at Oxford University Preparing for COP24 United Nations Climate in Katowice, Poland

Fast Ratcheting down of Personal and Global Carbon Budgets

To achieve the 'Ambition of 1.5 degrees' of warming that we proposed in the **Paris Agreement Targets**, we need to reconsider available methodologies for moving faster towards stabilising the global climate. We re-examine and re-calculate the scientific and technological options.

Therefore our event introduces the use of Global and Personal Carbon Budgets, and the new pathway solution suggested by the Green Economics Institute for implementation by the **COP23 and COP24**.

The event will provide a space to debate and consider the options. It will explain the latest science, economics and life style advice for United Nations delegations, **Focal Points, United Nations' Research Organisations (RINGOs)** and the Chair and his teams and for the general public.

Further explanations and information about this can be found on our website www.geiclimate.org. At this event, we explore **Lifestyle Changes, Market Options, Regulations and Technological & Scientific Options**.

Speakers invited include: Michelle Gale COP Delegation Leader, Professor Maria Madi, Benoit Monange, Fondation de L'ecologie Politique (France) & Hans Kare Flo, Tekna (Norway), Professor Graciela Chichilniski (IPCC Report Leader)

This event is organised by the Green European Foundation with support from The Green Economics Institute
With the financial support of the European Parliament to the Green European Foundation.

Programme

10.00- to 11.00 Panel 1

Introduction to the Science

United Nations Climate Process COP21-COP24. The Paris Agreement 'Ambition'

11.00-11.30 Coffee Break

11.30 -13.00 Panel 2

Switching from Coal to renewables

The Context of Poland and the rapid change from Coal to Renewables

13.00-14.00 Lunch

14.00-15.00 Panel 3

Examining The Technology Options

Renewables. Carbon and Distribution

15.00-16.00 Panel 4

Achieving a 2 Tonnes of Carbon Lifestyle and Economy- Methodologies and Pre requisites. Closing Panel and Discussion

Information

Venue: St Hugh's College, Oxford

Date: Sunday 17th June 2018 10.00-16.00

Please register to ensure your place

Tickets £95.00 for this event are available at
