

GREEN EUROPEAN FOUNDATION

13th Annual 3 Day Green Economics Institute, Conference To be held at The University of Oxford 16th-18th June 2018 2 Tonnes of Carbon by 2022: Lifestyle, Economics & Science

Conference Day 1 16th June 2018 Economics fit for 21st Century Reliance
Questioning 100 years of the *Law of the Jungle* for Economics, Companies & Corporations? We propose big changes! Proposing a 2 tonnes of Carbon Economy The role of the economy, the firm, the law in the 21st century. Do we really need the Economisation and Financialisation of everything? What happened to other values ? Partners Heterodox Economics Association, The International Journal of Green Economics. The future of Jobs, Automation, Green Jobs, the Precarious and Gigg Economy will be examined by experts. A new field of Evaluating Corruption will be launched.

The theory and philosophy of economics, toleranance and social and environmental justice will be big themes of this conference.

5 New books will be launched and the authors will be presenting them

Conference Day 2 June 17th Fast Ratcheting down of Carbon Budgets
To achieve the 'Ambition of 1.5 degrees' of warming that we proposed in the **Paris Agreement Targets**, we need to reconsider available methodologies for moving faster towards stabilising the global climate. We re-examine and re - calculate the scientific and technological options. Therefore our event introduces the use of Global and Personal Carbon Budgets, and new pathway solutions suggested by the Green Economics Institute for implementation by **COP23 & COP24**. It will explain the latest science, economics and life style advice for United Nations delegations, and **United Nations' Research Organisations (RINGOs)** Preparing for Katowice COP24 in Poland. Experts from 30 countries, teams from Africa, Estonia, Italy and Japan and many others. Expert Psychiatrists examine how humans make decisions.

Conference Day 3 June 18th Models of vibrant inward migration economies.
